

Tried & True Health Guarantee

At Tried & True Labradors we understand that you are looking to purchase an exceptional English Labrador! In order to ensure the caliber of puppy you are purchasing we have a health guarantee in place;

With the purchase of each pup, we guarantee our puppy's elbows to have an OFA (Orthopedic Foundation for Animals) rating of Fair, Good, or Excellent at 12 months old based on the official clearances of both the sire and dam OR we will replace your puppy at that time.

In the case that a puppy should receive an OFA rating other than the acceptable ratings listed above, Tried & True Labradors would then receive the dog back at that time to have the OFA tests confirmed by our veterinarian. Once confirmed by our veterinarian, Tried and True Labradors would regain full ownership of the dog to live a happy and successful life and the client would be refunded another puppy.

We NEVER refund money but will provide you a new puppy in exchange for the one of underrated OFA score.

*As a disclaimer we like for our clients to know that Labrador Retriever is a breed that is susceptible to hip and elbow dysplasia which is why we emphasize the importance of responsible and educated breeding. Tried & True Labradors invests an extensive amount of time into carefully researching and choosing healthy English Labradors to breed. This is how we can confidently ensure that a puppy bred by Tried & True Labradors comes with a clean bill of health.

For more information of OFA testing and the Labrador breed be sure to check out this helpful site: <https://www.ofa.org/diseases/hip-dysplasia>
